Overview

Gallaway Consulting, is a multi-disciplinary consulting firm specializing in permit facilitation, planning and environmental analysis. We are dedicated to providing efficient, professional environmental consulting and project management services that are based on sound science, and exceptional knowledge of pertinent regulations. We specialize in environmental science planning, natural resource management and innovative solutions. Gallaway Consulting, Inc. has operated in northern California for over 10 years and has served a diverse clientele from federal agencies to private landowners.

With a thorough understanding of the Clean Water Act, Endangered Species Act, and planning law, Gallaway Consulting offers forward thinking solutions to fulfill our clients' needs.

Client Relationships

One of the greatest strengths of Gallaway Consulting are the professional relationships we have developed with the regional regulatory community, the development community and private landowners. Being known and respected by these often adversarial entities enables us to facilitate responsible development. Our solid reputation among the regulatory agencies serves us well when providing services to our clients, particularly in our approach to crafting creative solutions to development constraints, mitigation, and natural resource management.

Approach

Providing quality customer service is one of our primary goals. Each project is supported by our staff biologists, wetland specialists, botanists, planners, arborists, GIS analysts and regulatory compliance experts who work cooperatively to develop creative solutions to address our clients' needs.

Gallaway Consulting is a California Certified Women-Owned Business Enterprise / Disadvantaged Business Enterprise

Summary of Qualifications

Project Planning and Management

Gallaway Consulting, Inc.'s unique approach to assisting our clients in land selection, project planning, mitigation design, and implementation results in successful projects. We offer the following project management and planning tools:
